SUMMARY

Full-stack developer (React, TypeScript, Node.js) shipping production UI at a US-based healthcare AI startup, and freelance developer of a full-stack aviation platform serving 10K+ monthly users. Built and deployed two additional full-stack projects solo an AI-powered resume scorer and a snippet manager with a Chrome extension.

SKILLS

Languages: JavaScript, TypeScript
Frontend: React.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS, Framer Motion, GSAP
Backend: Node.js, Express.js, REST APIs, Socket.io, JWT Authentication, Google OAuth
Databases: MongoDB, MySQL, Firebase
Programming: Data Structures & Algorithms
Tools & Deploy: Git, GitHub, Postman, Chrome Extension APIs, Vercel

EXPERIENCE

Trainee Full Stack Developer - EasyComm Innovations (On-Site, Indore) **Sep 2026 - Present**

- Developing and implementing full-stack web application features, working across frontend, backend, REST APIs, and database integration to deliver functional, scalable, and maintainable software solutions.
- Collaborating with the engineering team to implement features, debug issues, optimize functionality, and follow software development best practices.

Frontend Intern - Connex AI (US-Based, Remote) **May 2026 - Sep 2026**

- Developing and shipping production-ready React + TypeScript UI components for a US-based healthcare AI startup, collaborating with cross-functional engineering teams across time zones to deliver scalable, performant frontend features.
- Maintaining type-safe codebase with TypeScript interfaces, actively participating in code reviews, sprint planning, and agile workflows in a remote-first team.

PROJECTS

HookLens - Real Time Webhook Inspection & Replay Platform | Live Demo | GitHub
React, TypeScript, Node.js, Express, MongoDB, Socket.io, Groq API

- Built a multi-tenant webhook inspection platform with dynamic endpoint generation, capturing headers, body, and query params in real time via Socket.io, removing the need for manual polling.
- Designed a role-based access control system (Owner, Admin, Member, Viewer) with JWT-protected routes, and integrated Groq API (LLaMA 3.3 70B) to auto-generate plain-English explanations of webhook payloads.

Stash - Web App & Chrome Extension | Live Demo | GitHub
React, TypeScript, Node.js, Express.js, MongoDB, JWT, Google OAuth

- Built a code snippet manager for organizing and retrieving reusable code, with structured storage and tag based filtering for fast search across large snippet libraries.
- Implemented JWT and Google OAuth to share a single authenticated session across both the web app and Chrome extension, syncing snippets in real time between them.

CERTIFICATIONS

Software Engineer - Verified Role Certificate HackerRank
Frontend Developer (React) - Verified Role Certificate HackerRank

EDUCATION

Bachelor of Computer Applications (BCA) 2023 - 2026
Government Holkar Science College, DAVV, Indore, MP
